

AI Coaching / Personalized AI
Enablement

WeCan AI

Think with AI. Not just use it.

Solve your real work challenges with AI,
and learn how to keep up as it evolves.

OUR APPROACH

Most **AI courses teach tools**. We do not.
At WeCan AI, we start with **your problem** and
then show you **how to solve it using AI**. At the
same time, we teach you how to think with AI:

- what it **can** and **cannot** do
- when **to use** it and when **not to**
- **how to guide it** to get better results

So you don't just learn one tool.
You become someone who can **use AI**
effectively, no matter how fast it changes.

OUR STRENGTH

No coding or AI background
required.

Trilingual coaching (English
| Arabic | French).

Focus on real world
applications, not just tools.

Practical results from the first
four sessions.

KEY FEATURES

Problem-Based Learning
Real tasks from your work
(not generic examples).

AI Critical Thinking
Clear judgment on how,
when, and why to use AI.

Prompt Architecture
Structured prompts that
guide different AI models.

AI Model Understanding
How AI works; explained
simply.

Tool Selection Frameworks
Clear methods for choosing
the right AI tools

Starting at **\$249** per 1-hour session
(1:1 coaching)

Minimum: 4 sessions
